## WHY CHOOSE US...

Our range of on-site and off-site capabilities keeps us at the forefront of the UK Fabrication and Mechanical Engineering sector...

- ▶ Bio-Pharma welding specialists
- ▶ Semi-conductor pipework contracts
- ▶ Experts in TIG, MIG, MAG & MMA
- ▶ Close head autonomous (orbital) welding
- ▶ Band-saw & orbital pipe-saw operation
- ▶ Machine pipe facing and bevelling
- ▶ CSWIP certified welding inspection

We pride ourselves on our reputation and with this in mind our attention to detail is unrivalled

### **PIPE WELDING**

Our service covers both fabricating and prefabricating; our team are experienced, conscientious and fully qualified. We work both on-shore and off-shore, cover all industries and have a reputation built on quality workmanship.

### **BIOPHARMACEUTICAL PIPEWORK**

Our Biopharmaceutical welding is unrivalled in the UK. Our team have extensive experience with the process; utilising orbital welding (and manual where required) to ensure safe delivery in the most hygienic and clinical of environments.

### **HVAC**

Our HVAC (heating, ventilation, air conditioning) installation, service and maintenance capabilities make WPS a leader in the UK. Our team of experienced mechanical engineers can undertake projects across a wide range of industry sectors.

### **WELDING INSPECTION**

WPS offer a comprehensive welding inspection service. Our experienced team leave no stone unturned when it comes to quality, inspection and reporting.

**On-shore and off-shore, we cover all industries and have a reputation built on quality workmanship**

## WHO DO WE WORK WITH...

A key factor in our success is the range of clients we work with. Our experience enables us to undertake contracts of any length and for both small and large projects.

On-site and off-site work is carried out with full plant and labour supplied by our team who are ASME IX / EN ISO 15614 qualified.
